

XyITECH®

Composite wood decking boards and profiles

- Environmentally friendly
- Innovative
- Superior quality
- Maintenance free

Residential

Ideal for the construction of decks , terraces, pool sides and other landscaping applications. XylTECH® boards allow you to create your own high quality individual and unique designs.

- Environmentally friendly...

A 100% RECYCLED AND 100%
RECYCLABLE MATERIAL!
AN ENVIRONMENTALLY FRIENDLY
ALTERNATIVE TO MASS DEFORESTATION!

Xyltech's unique blend of high quality wood
fibres and recycled high density polymers, gives
the product a superior quality second to any
other composite.

- XylTECH® boards combine **the aesthetically pleasing look and warmth of exotic wood** with the longevity and easy upkeep of plastics.

- Xyltech's boards grooved and/or brushed surface is perfect for their **use in wet areas** (spa, Jacuzzi, outside showers, pool, pool house etc...).

- Xyltech does not defibre, fade, crack, split or cause splinters.

Professional

XyITECH® boards and profiles are ideally suited to forward thinking architects and local authority planners committed to reducing their carbon footprint by using recycled friendly materials.

XyITECH® is ideal for a wide range of applications in non structural architecture, outside retail spaces, park amenities, schools, terraces for pubs, cafes, hotels and restaurants.

• Innovative...

EXTRA LONG LIFE

XyITECH® boards are weather resistant, hardwearing and aesthetically pleasing.

As well as being totally water and rot proof, XyITECH® is resistant to mould, fungi and other traditional problems facing timber (various insects, termites...).

XyITECH® is also **resistant to corrosion caused by salt and chlorinated water**: a major asset for certain outside amenities.

EASY MAINTENANCE

A simple clean with soapy water or a high pressure cleaner (80 bars maximum) is enough to maintain XyITECH® looking as good as new: no other special treatment is necessary.

EASY AND QUICK TO INSTALL

Stainless steel clips and screws are used for rapid and invisible fixing of the boards (refer to our installation technique document).

Marina

XyITECH® boards and profiles are suitable for all types of marine environment to meet highly technical and specific developments – pontoons, quays, jetties, gangplanks, catwalks, landing stages, riverbank developments etc...

•... and superior quality!

- Easy and quick to install and maintain
- Can be worked like wood (same tools)
- Suitable for all non structural projects
- 25 year guarantee

As a result of constantly developing techniques, the information and instructions contained in this brochure are given for merely indicative purposes and are not binding on us. Installation conditions and the recommendations given in our technical instructions must be respected.

The manufacturer and its distributors having no control over the use of material by third parties, they may not accordingly guarantee the same results as those described in this document. Each user must carry out their own tests to determine to what extent the material meets their needs. The manufacturer and its distributors may not be held liable for damage caused by faulty installation of the material.

Colours are not contractually binding. Differences may be found depending on variations in raw materials used in the formulation of the product.

The 25 year guarantee covers termites and fungi, and is limited solely to the replacement of boards. (See our full guarantee form)
